

SITE ASSISTANCE SERVICES
PRE-COMMISSIONING & COMMISSIONING
TRAINING
AFTER SALES SERVICING

Angus Fire Engineering has been servicing sites around the globe, both onshore and offshore, for numerous years for both Angus equipment/solutions as well as third party equipment. Our technical and administration team work together to tailor a solution for your maintenance requirements which is bespoke to individual needs.

We can provide national and international pre-commissioning / commissioning on a whole range of Fire Fighting Equipment and systems, to NFPA / BS standards, in the oil, gas and petrochemical industry, both on and offshore.

This includes but is not limited to:

- Pre-Commissioning
- Commissioning
- Factory acceptance testing (FAT)
- Site acceptance testing (SAT)
- Verification of system operation
- Training
- Foam testing
- Repair and refurbishment

Fixed Systems

Mobile Systems

Site Training

As Angus Fire is the manufacturer, we are best positioned to provide long term support for your equipment. We have fully qualified Designers and Engineers at Angus Fire Engineering who offer an exceptional and extensive depth of technical and hands on experience. We can support your project right through from design phase, all the way through to Commissioning with our staff, ensuring you have the best quality of pre and after care for your equipment.

We recommend commissioning is carried out by Angus Fire Engineering to preserve the warranty of the goods being supplied and / or maintain the life through regular servicing as recommended by NFPA / BS.

To discuss your requirements further please contact proposal engineer at the front of the bid or email us on afe.proposals@angusuk.co.uk or afe.service@angusuk.co.uk

“integrity is doing what’s right not just what’s convenient“
